Time Estimates on Domestic Shipping

The above UPS map estimates the time of arrival for your package and is *relatively accurate*, but <u>not</u> <u>guaranteed</u>.

To calculate your order's time of arrival please add the appropriate number of days (noted above) from, but not including the day your package will be shipping out. *I.e., if your package ships out on Wednesday and you live in North Georgia, your order will arrive on Friday.*

Orders placed before 5pm est. Monday through Friday will ship out that same business day. Exceptions may apply.
